Founding Members of the Giannini Foundation of Agricultural Economics
1929

At the initial stages of its development it is recommended that the following individuals be made members of the staff of the Foundation, with the titles indicated.

C.B. Hutchison    Director of the Giannini Foundation, Professor of Agriculture and Associate Director of Research in the Experiment Station
B.H. Crocheron    Director of Agricultural Extension, Professor of Agricultural Extension and Agricultural Economist on the Giannini Foundation
L.W. Fluharty      Specialist in Agricultural Extension and Associate on the Giannini Foundation
H.R. Wellman      Specialist in Agricultural Extension and Associate on the Giannini Foundation
H.E. Erdman       Professor of Agricultural Economics and Agricultural Economist in the Experiment Station and on the Giannini Foundation
Frank Adams       Professor of Irrigation Investigations and Practice and Irrigation Economist in the Experiment Station and on the Giannini Foundation
R.L. Adams        Professor of Farm Management and Agricultural Economist in the Experiment Station and on the Giannini Foundation
Walter Mulford    Professor of Forestry and Forest Economist on the Giannini Foundation
E.C. Voorhies     Associate Professor of Agricultural Economics and Associate Agricultural Economist in the Experiment Station and on the Giannini Foundation
David Weeks       Associate Professor of Agricultural Economics and Associate Agricultural Economist in the Experiment Station and on the Giannini Foundation
E.W. Braun        Specialist in Agricultural Extension and Associate on the Giannini Foundation
S.W. Shear         Assistant Agricultural Economist in the Experiment Station and on the Giannini Foundation
C.H. West          Assistant Agricultural Economist in the Experiment Station and on the Giannini Foundation
F.R. Wilcox       Specialist in Agricultural Extension and Associate on the Giannini Foundation

The annals of the Giannini Foundation of Agricultural Economics provide a brief historical description of the Giannini Foundation of Agricultural Economics, University of California, and reflect the contribution of Foundation members to the profession. It was prepared for the occasion of the 75th Anniversary Symposium held on the Davis campus. The event memorialized A.P. Giannini’s early affiliation with agriculture and his generous gift to the university in support of California agriculture and rural areas in a period of difficult economic times. In addition, the symposium celebrated the accomplishments of the Foundation over the past seventy-five years in meeting the changing needs of this dynamic sector of the California economy and examined challenges and issues that deserve the university’s attention as we move forward through the twenty-first century. Commissioned papers and discussant comments are published for general audiences.

The University of California’s 2005/06 academic year included two celebrations commemorating the 1928 gift of $1.5 million to the Regents of the University of California in tribute to A.P. Giannini, founder and president of Bancitaly Corporation. The gift specified that no more than one-third of the gift be used for construction of Giannini Hall on the Berkeley campus, designated to house the Giannini Foundation of Agricultural Economics. In September 2005, the seventy-fifth anniversary of completion of Giannini Hall was memorialized by an event sponsored by the College of Natural Resources.

The Giannini Foundation of Agricultural Economics

The remainder of the gift became an endowment fund supporting the Giannini Foundation of Agricultural Economics. The endowment provides important support for activity in agricultural and resource economics at the University of California. The gift specifies that the annual income from the endowment is to support “the activities of the Foundation [which] are to be regarded as chiefly: (a) those of research with the purpose to find the facts and conditions which will promise or threaten to affect the economic status of California agriculturists; and (b) those of formulating ways and means of enabling the agriculturists of California to profit from the existence of favorable facts and conditions, and to protect themselves as well as possible from adverse facts and conditions.”

The mission of the Foundation broadly encourages production and dissemination of scientific information relating to production, marketing, and consumption of agricultural commodities; development and allocation of natural and environmental resources; welfare of farm families, farm laborers, and rural communities; and interrelationships among the agricultural sector, the rural community, and other components of the state, national, and world economies.

The Giannini Foundation is a systemwide University of California organization reporting to the Division of Agriculture and Natural Resources in the Office of the President. There are currently fifty-nine active members. Associate membership is accorded to other professional economists (ten in 2009) with interests in the programs and activities of the Foundation.

The Foundation budget is used to support selected research projects; sponsor publication of the bimonthly ARE Update, which reports topical activities of members; publish the Giannini Foundation research series; and promote a number of activities designed to enhance the professional work of Foundation members and associates and enhance the relevance of that work to problems faced by society at large.

Early History

All University of California teaching, research, and extension programs in agriculture were administered from the Berkeley campus during the first half of the 1900s, including agricultural programs located at the University Farm at Davis, the Citrus Research Station at Riverside, and the Los Angeles campus. The founding members of the Giannini Foundation were an eclectic group, including eight economists (six agricultural economists, a forest economist, and an irrigation economist), the director of Agricultural Extension and four Extension specialists, and the first director of the
Giannini Foundation, Claude B. Hutchison, an agricultural scientist who was formerly the director of the Davis branch of the College of Agriculture from 1922 to 1924. Hutchison quickly launched an expanded program in research and extension in marketing, finance, and management problems of California farmers.

**Current Structure**
The chair of the Berkeley Department of Agricultural Economics served as director of the Foundation for much of its early history. The Berkeley and Davis departments were one department, with the chair at Berkeley and the vice chair at Davis, until 1966, when the Department of Agricultural Economics became an independent unit of the College of Agriculture at Davis. Reorganizations since have attempted to recognize the expanded spheres of responsibilities that have resulted from delegation of many activities to general campuses of the university.

Leadership of the Foundation is now vested in the Giannini Foundation Executive Board with three standing members (the UC vice president of Agriculture and Natural Resources and the chairs of the Berkeley and Davis departments) plus two Foundation members—one each from Berkeley and Davis serving staggered six-year terms with the senior one named as director of the Foundation for a three-year period.

**Library Facilities**
The Giannini Foundation Library at Berkeley was opened in 1930 to provide needed research material for the Foundation staff. It is considered to be one of the finest specialized collections in agricultural economics in the world. The Davis departmental library is a smaller, excellent research library that has been developed with departmental, campus, and Foundation support. Both libraries contain a wide range of materials—papers, books, periodicals, serials, conference proceedings, and symposia and workshop reports, as well as reports and statistics from local, state, national, and international governmental agencies, associations, societies, research foundations, and business organizations. Both libraries are noncirculating libraries, but they are also open to others for on-site use.

PROGRAMS IN AGRICULTURAL AND RESOURCE ECONOMICS

The Departments of Agricultural and Resource Economics at Berkeley and Davis and the Department of Environmental and Natural Resource Economics at Riverside support undergraduate and graduate teaching, research, public service, and Cooperative Extension programs. Research programs cover agribusiness, agricultural and resource policy, agricultural marketing, applied econometrics, demand analysis, development, environment and resources, finance, food policy, human resources, intellectual property rights/biotechnology, international trade, and production economics. Cooperative Extension program areas include farm management and production economics; utilization, development, pricing, and management of natural resources and the environment; food distribution and marketing; food safety; management and finance; market performance and structure; risk management; agricultural labor and personnel management; and trade and development.

Chronology of Faculty and Specialist Appointments at Berkeley, Davis, Los Angeles, and Riverside

Early Appointments at UC Berkeley

Pre-1908
Leroy Anderson, professor of agricultural practice; superintendent of farm schools; taught the first course in farm management at Berkeley

1913
O.J. Kern, Department of Agricultural Education; taught in rural institutions
Bertram H. Crocheron, director, Agricultural Extension
Frederick L. Griffin, Department of Agricultural Education; taught in rural institutions

1914
Richard L. Adams, agronomy; taught farm management; later held appointment in Department of Agricultural Economics
Walter Mulford, forestry

1915
Elwood Mead, rural institutions
Frank Adams, irrigation, Berkeley; later appointed at Davis

1919
Edwin C. Voorhies, animal husbandry; later appointed to Department of Agricultural Economics

1920
William R. Camp, rural institutions
Claude B. Hutchison, director of the College of Agriculture; later appointed as first director of the Giannini Foundation of Agricultural Economics

1922
Henry E. Erdman, rural institutions; later appointed to Department of Agricultural Economics

1923
Lee W. Fluharty, Agricultural Extension, Berkeley; later appointed to Department of Agricultural Economics

1924
Sherwood W. Shear, rural institutions; later appointed to Department of Agricultural Economics
Charles H. West, rural institutions

1925
Harry R. Wellman, Agricultural Extension, Berkeley; later appointed to Department of Agricultural Economics
Emil Rauchenstein, farm management
David Weeks, land economics

Departmental Appointments in Academic Units of the Foundation

1929
Claude B. Hutchison, Berkeley

1930
George M. Peterson, Berkeley
Howard R. Tolley, Berkeley

1931
Murray R. Benedict, Berkeley
James M. Tinley, Berkeley

1932
Howard J. Stover, Berkeley

1935
Harry R. Wellman, Berkeley

1937
Carl L. Alsberg, Berkeley

1938
Siegfried von Ciriacy-Wantrup, Berkeley

1939
Sidney S. Hoos, Berkeley
George M. Kuznets, Berkeley
Roy J. Smith, Los Angeles

1942
Dorothy S. Thomas, Berkeley

1946
George L. Mehren, Berkeley

1947
Trimble R. Hedges, Davis
Ivan M. Lee, Berkeley

1948
Raymond G. Bressler, Jr., Berkeley
Varden Fuller, Berkeley
Kenneth D. Naden, Los Angeles
Henry J. Vaux, Berkeley
John A. Zivnuska, Berkeley

Departmental Designations

Berkeley 1925–1975 – Agricultural Economics
1975–1998 – Agricultural and Resource Economics

Davis Through 1966 – Agricultural Economics (administered by Berkeley)
1966–1995 – Agricultural Economics
1995–2009 – Agricultural and Resource Economics

Los Angeles Agricultural Economics (terminated in 1960)

Riverside Environmental Sciences Program within Department of Environmental and Natural Resource Economics
1949  Jerry Foytik, Davis
1950  James M. Tinley, Davis
1951  David A. Clarke, Jr., Berkeley
1952  Guy Black, Berkeley
      Chester O. McCorkle, Jr., Davis
1953  James B. Hassler, Berkeley
      J. Herbert Snyder, Davis
1954  Edwin C. Voorhies, Davis
1955  James N. Boles, Berkeley

Publication of Enduring Quality Awards

QUALITY OF RESEARCH DISCOVERY AWARDS (OUTSTANDING PUBLISHED RESEARCH REPORT)

Outstanding Journal Article Awards

Quality of Communication Awards

**Distinguished Policy Contribution Award**

1992 George E. Rossmiller and Kenneth R. Farrell for their leadership in developing the National Center for Food and Agricultural Policy and fostering work on food, agricultural, and related policies.

1993 Gordon C. Rausser for contributions to the research base, policy debate, and reform concerning agricultural production inflexibilities and macroeconomic linkages.

1995 Daniel A. Sumner for contributions to U.S. agricultural policy analysis, formulation, negotiation, and implementation both through scholarly work at the university and in government service, domestic and international.

1998 Colin A. Carter for research that identified the empirical importance of inefficiencies in the operations of state trading enterprises, changing the way that farmers and policy makers view agricultural state trading enterprises.

2001 Julian M. Alston and Philip G. Pardey for their joint program of work on the economic analysis of agricultural R&D, science, and technology policy.

**Outstanding Article in Choices Award**

**Outstanding Review of Agricultural Economics Article**

**Distinguished Extension/Outreach Program Award**

1982 George Goldman.

2007 Steven C. Blank, Individual with Ten or More Years of Experience.

2007 *ARE Update*, Outstanding Agricultural Economics Electronic Newsletter.

**Distinguished Graduate Teaching Award**

1998 James E. Wilen, University of California, Davis.

2000 Jeffrey Williams, University of California, Davis.

1996  Kathryn B. Bicknell, Economic Issues Relating to the Control of Bovine Tuberculosis in New Zealand: A Bioeconomic Model of Livestock Disease Control. UC Davis.

The Monograph Series provides an outlet for reports of research that are longer than journal papers but directed to the same audience and appraised by criteria equivalent to those of leading technical journals in agricultural economics. The first seventeen monographs were published in the University of California’s Hilgardia series. In 1967 the Giannini Foundation began a separate series for reports in agricultural economics but continued the numbering sequence.

**Information Series**

The Information Series communicates selected research results to a lay audience. The series, initiated in 1963, is numbered serially within years with recent reports listed here.

Research Report Series

The Research Report Series communicates research results to specific professional audiences (e.g., agricultural industry economists, resource agency staffs, and other professionals) interested in applications. Due to limitations on space, only the more recent reports are listed.

**SPECIAL REPORT SERIES**

The Special Report Series provides an outlet for items worthy of publication but not fitting into one of the regular series.

91-1 Hired Hands in California’s Fields. V. Fuller, 1991.

09-2 The Prospective Free Trade Agreement with Korea: Background, Analysis, and Perspectives for California Agriculture. H. Lee and D.A. Sumner, 2009.

**GIANNINI REPORTER**

The Reporter provides information on the ongoing research of the Foundation, extension of that research, and other related activities. Twenty-one issues have covered various time periods, with biennial publication since 1995.

**ARE UPDATE**

ARE Update is a bimonthly magazine providing wide dissemination of research results and expert opinion from faculty and graduate students in agricultural and resource economics at UC Davis and UC Berkeley. ARE Update targets a lay audience of policy-makers, farm advisors, and other professionals interested in agricultural, resource, environmental, and development economics.
